

ΕΠΙΦΑΝΥ

E: Epiphany *noun*

1. an appearance, revelation, or manifestation of a divine being.
2. a revelation of the basic nature of something; a perception of some essential truth.

[from] Greek *epiphaneia*, literally, appearance, manifestation, from *epiphanés* coming to light, appearing, from *epiphainein* to manifest

ΜΕΔΙΤΑΤΙΟΝ

Epiphany is that moment when the world is seen in a gossamer state: glistening, pristine and lucid. Before the epiphany is the state of the unknown, ambiguity, it could even be a sense of darkness.

That ambiguity or unknown can be associated with hovering, no direction, searching, endless turnings and pushing.

But then, the epiphanic moment happens, as if coming from nowhere. After that moment, there is direction, a way forward.
